

DIVISION CAPABILITIES

Impact Extrusion

Kurt Manufacturing is a highly diversified aluminum impact extrusion contract manufacturer, providing products over a wide range of industries including: military, defense, consumer products markets and packaging as well as agricultural equipment and building products segments. We also offer value-added secondary operations to the extrusions, including a wide range of machining, heat treating, and coating options.

The heart of the value we provide to customers is technical competency and the ability to convert components to impact extrusions that previously may not have been suitable to this process. Customers will benefit from lower tooling costs, increased product quality, lower inventory costs, and increased margins.
